Introduction

The list which follows consists of books dealing in whole or significant part with Marine Corps operations and related matters in World War II.

To obtain the greatest possible value to the largest number of researchers and writers, broad criteria for selection of items to be included have been utilized. Inclusion of any given title does not, therefore, necessarily constitute Marine Corps acceptance or endorsement of an author's views, conclusions, or, indeed, complete historical accuracy. By the same token, the annotation supplied is in the nature of description of the content of books and articles rather than a critical evaluation.

The annotation "notes" indicates that the publication is documented as to research sources; "bibliog." indicates that a bibliography of research materials is appended. The inclusion of illustrations and portraits is indicated by "illus." and "ports."
